

Senior Precision Agronomist

About Us: CropPro Consulting is a Saskatchewan-based independent agronomy firm that began in 2003. Our staff work from homebased offices. At CropPro, we pride ourselves in our integrity, sincerity, and consistency to deliver the best value to our clients. One core business is our SWAT MAPS variable rate service. Soil, water and topography (SWAT) MAPS is the foundation of all soil applied variable-rate applications, enabling farmers to better understand their field variability to optimize crop inputs and profitability. You can find more information on our services at www.croppro.ca.

The Opportunity: We are seeking two self-motivated, hardworking individuals to take on the full-time roles of Senior Precision Agronomist starting immediately. This person will work from a home office and service clients generally within a 100 km radius of their home office - but travel to other regions may be required on occasion. You will be involved in both crop scouting and variable-rate services, including soil sampling, fertilizer recommendations by zone, overall farm fertility planning, VR assessments and client contact. Your home location can be flexible, but should be within one hour of Yorkton or Humboldt - please include your home base (or willingness to relocate) in your cover letter.

Requirements:

- Bachelor's Degree or Diploma in Agriculture, or related field
- 5 years agronomy experience, or knowledge of pesticides and fertilizers an asset.
- High level of integrity and commitment to providing unrivaled service
- Strong level organization skills and independence to work remotely and without supervision
- Must be willing to work overtime in peak seasons
- Must be willing to contribute to market development and business growth efforts in the region
- Excellent written & verbal communication skills and computer skills

Responsibilities:

- Make verbal and written recommendations for seed, fertilizer and pesticide applications
- Ground-truth newly mapped fields using SWAT MAPS and soil sample all fields by 5 zones using SWAT MAPS
- Interpret soil test results and deliver actionable advice for soil fertility management
- Perform VR assessments after seeding & before harvest to ensure accuracy and effectiveness of VR prescriptions
- Consult with prospective SWAT MAPS clients; support the sales team in acquiring new acres in the area
- Conduct full-farm scouting services to our clients that are signed up for this.

The successful candidate will have a company truck, computer and all other required equipment will be supplied. We offer a competitive salary with annual bonus incentive and growth opportunities. Also offered is an attractive group benefits and pension plan. Please apply with your own salary expectations. This position has flextime hours, meaning 6-day weeks in peak season and 4-day weeks in off-season.

Applications:

Please send a cover letter, resume and references to Agronomy Operations Manager - Kerrie de Gooijer: kerrie@swatmaps.com. Only those selected for interviews will be contacted.
